

## BIG IDEAS

User needs and interests drive the design process.

Social, ethical, and sustainability considerations impact design.

Complex tasks require different technologies and tools at different stages.

## Learning Standards

Curricular Competencies	Content
<p><i>Students are expected to be able to do the following:</i></p> <p><b>Applied Design</b></p> <p><i>Understanding context</i></p> <ul style="list-style-type: none"> <li>Engage in a period of research and <b>empathetic observation</b></li> </ul> <p><i>Defining</i></p> <ul style="list-style-type: none"> <li>Identify potential users and relevant contextual factors for a chosen design opportunity</li> <li>Identify criteria for success, intended impact, and any <b>constraints</b></li> <li>Determine whether activity is collaborative or self-directed</li> </ul> <p><i>Ideating</i></p> <ul style="list-style-type: none"> <li>Take creative risks in generating ideas and add to others' ideas in ways that enhance them</li> <li>Screen ideas against criteria and constraints</li> <li>Critically analyze and prioritize competing <b>factors</b> to meet community needs for preferred futures</li> <li>Maintain an open mind about potentially viable ideas</li> </ul> <p><i>Prototyping</i></p> <ul style="list-style-type: none"> <li>Visualize possibilities and develop a <b>plan</b> that includes key stages and resources</li> <li>Evaluate a variety of materials for effective use and potential for reuse, recycling, and biodegradability</li> <li>Prototype, making changes to tools, materials, and procedures as needed</li> <li>Record <b>iterations</b> of prototyping</li> </ul>	<p><i>Students are expected to know the following:</i></p> <ul style="list-style-type: none"> <li>design opportunities</li> <li>drafting <b>terminology</b></li> <li>drawing <b>standards</b> and <b>conventions</b></li> <li>scales for different <b>types</b> of drawings</li> <li>drafting styles, including perspective, mechanical drafting, and architectural drawing</li> <li>modelling using computer-aided design (CAD) and computer-aided manufacturing (CAM) software</li> <li>coding for creating 3D representations of design solutions</li> <li>equipment and tools for manual and computer-aided drafting</li> </ul>

## Learning Standards (continued)

Curricular Competencies	Content
<p><b>Testing</b></p> <ul style="list-style-type: none"><li>Identify <b>sources of feedback</b></li><li>Develop an appropriate test</li><li>Conduct the test, collect and compile data, evaluate data, and decide on changes</li></ul> <p><b>Making</b></p> <ul style="list-style-type: none"><li>Identify and use appropriate tools, <b>technologies</b>, materials, and processes</li><li>Make a step-by-step plan and carry it out, making changes as needed</li><li>Use materials in ways that minimize waste</li></ul> <p><b>Sharing</b></p> <ul style="list-style-type: none"><li>Decide on how and with whom to <b>share</b> product and processes</li><li>Demonstrate product to users and critically evaluate its success</li><li>Identify new design goals</li></ul> <p><b>Applied Skills</b></p> <ul style="list-style-type: none"><li>Demonstrate and document an awareness of precautionary and emergency safety procedures</li><li>Develop competency and proficiency in skills at various levels involving manual dexterity and drafting techniques</li><li>Identify the skills needed, individually or collaboratively, in relation to specific projects, and develop and refine them</li></ul> <p><b>Applied Technologies</b></p> <ul style="list-style-type: none"><li>Choose, adapt, and if necessary learn more about appropriate tools and technologies to use for tasks</li><li>Evaluate <b>impacts</b>, including unintended negative consequences, of choices made about technology use</li><li>Evaluate the influences of land, natural resources, and culture on the development and use of tools and technologies</li></ul>	

Curricular Competencies – Elaborations

- **empathetic observation:** may include experiences; traditional cultural knowledge and approaches of First Peoples and those of other cultures; places, including the land and its natural resources and analogous settings; people, including users, experts, and thought leaders
- **constraints:** limiting factors such as task or user requirements, materials, expense, environmental impact
- **factors:** including social, ethical, and sustainability
- **plan:** for example, pictorial drawings, sketches, flow charts
- **iterations:** repetitions of a process with the aim of approaching a desired result
- **sources of feedback:** may include First Nations, Métis, or Inuit community experts; keepers of other traditional cultural knowledge and approaches; peers, users, and other experts
- **technologies:** tools that extend human capabilities
- **share:** may include showing to others or use by others, giving away, or marketing and selling
- **impacts:** personal, social, and environmental

Content – Elaborations

- **terminology:** for example, scale, weight, plan, elevation, section
- **standards:** for example, line types, line weights
- **conventions:** for example, layout, drawing setup
- **types:** for example, plans, section, detail
