

BIG IDEAS

Algebra allows us to **generalize** relationships through abstract thinking.

The meanings of, and **connections** between, each operation extend to powers and polynomials.

Constant rate of change is an essential attribute of **linear relations** and has meaning in different representations and contexts.

Trigonometry involves using **proportional reasoning** to solve **indirect measurement** problems.

Representing and analyzing **situations** allows us to notice and wonder about relationships.

Learning Standards

Curricular Competencies	Content
<p><i>Students are expected to do the following:</i></p> <p>Reasoning and modelling</p> <ul style="list-style-type: none">Develop thinking strategies to solve puzzles and play gamesExplore, analyze, and apply mathematical ideas using reason, technology, and other toolsEstimate reasonably and demonstrate fluent, flexible, and strategic thinking about numberModel with mathematics in situational contextsThink creatively and with curiosity and wonder when exploring problems <p>Understanding and solving</p> <ul style="list-style-type: none">Develop, demonstrate, and apply mathematical understanding through play, story, inquiry, and problem solvingVisualize to explore and illustrate mathematical concepts and relationshipsApply flexible and strategic approaches to solve problemsSolve problems with persistence and a positive dispositionEngage in problem-solving experiences connected with place, story, cultural practices, and perspectives relevant to local First Peoples communities, the local community, and other cultures	<p><i>Students are expected to know the following:</i></p> <ul style="list-style-type: none">operations on powers with integral exponentsprime factorizationfunctions and relations: connecting data, graphs, and situationslinear functions: slope and equations of linesarithmetic sequencessystems of linear equationsmultiplication of polynomial expressionspolynomial factoringprimary trigonometric ratiosfinancial literacy: gross and net pay

Learning Standards (continued)

Curricular Competencies	Content
<p>Communicating and representing</p> <ul style="list-style-type: none">• Explain and justify mathematical ideas and decisions in many ways• Represent mathematical ideas in concrete, pictorial, and symbolic forms• Use mathematical vocabulary and language to contribute to discussions in the classroom• Take risks when offering ideas in classroom discourse <p>Connecting and reflecting</p> <ul style="list-style-type: none">• Reflect on mathematical thinking• Connect mathematical concepts with each other, other areas, and personal interests• Use mistakes as opportunities to advance learning• Incorporate First Peoples worldviews, perspectives, knowledge, and practices to make connections with mathematical concepts
