

My Core Competency, Grade 10.

Communication:

This acrostic poem will demonstrate how I communicate best in school work, socialization and sports. I believe that for me to communicate my best, I have to consider the following aspects before sharing my work with others.

C - **Collaboration** with others allows me to be influenced by other opinions and it will strengthen my bond with other people, which usually allows for healthy friendships and communication.

O - **Optimism** while working on school work with others allows us to produce the best work possible, so when we present it or hand it in, we are confident with ourselves.

M - **Media** is how I learn of global events, my peer's lives, and it is a very prominent source of communication in today's world.

M - **Making Posters** is how I typically choose to show my work, I really enjoy working with paper and I appreciate having a visual diagram for everyone to look at.

U - **Uniqueness** is what I aim for in all my communicating. Whether it be school work, sports, or work, I want to stand out as kind and hard working. It is very important to me that I always portray an image that fits who I really am.

N - **Neatness** is crucial to me in all my school work, and I make sure that is demonstrated when I present posters to my classes.

I - **Interest** is what pushes me to do my best in everything I do. While communicating, I'm more passionate and excited to learn if I'm interested in the subject matter.

C - **Consideration** in the quality of the demonstration of our learning is very important in effectively communicating our findings with others.

A - **Accepting advice** from my teachers and coaches on my work is how I produce the best version of myself. When taking their words into consideration, I allow myself to have a growth mindset that will let me get better in whatever I'm doing.

T - **Talking** with others is how I naturally source most of my information. It is important that we socialize, because it creates healthy relationships and develops social skills that are mandatory in life.

I - **Independent reading or writing time** is a task I really appreciate when given to me, because it allows me to pursue a topic of interest and develop a broader understanding of it.

O - **Online sources**, such as PowerPoint, Prezi, or Office365 have never let me down when it comes to creating presentations that are tidy, effective, and easy to do.

N - **Networking** with other people allows me to share ideas, learn from other opinions, and create bonds with people who share similar interests as me.
