

BIG IDEAS

Products can be **designed for life cycle**.

Personal design interests require the evaluation and refinement of skills.

Tools and technologies can be adapted for specific purposes.

Learning Standards

Curricular Competencies	Content
<p><i>Students are expected to be able to do the following:</i></p> <p>Applied Design</p> <p><i>Understanding context</i></p> <ul style="list-style-type: none"> Conduct user-centred research to understand design opportunities and barriers <p>Defining</p> <ul style="list-style-type: none"> Choose a design opportunity and point of view Identify potential users, intended impact, and possible unintended negative consequences Make inferences about premises and boundaries that define the design space <p>Ideating</p> <ul style="list-style-type: none"> Take creative risks to identify gaps to explore as design space Generate ideas to create a range of possibilities and add to others' ideas in ways that create additional possibilities Critically analyze how competing social, ethical, and sustainability considerations impact designed solutions to meet global needs for preferred futures Prioritize ideas for prototyping and designing with users <p>Prototyping</p> <ul style="list-style-type: none"> Identify and use a variety of sources of inspiration and information Choose an appropriate form, scale, and level of detail for prototyping, and plan procedures for prototyping multiple ideas Analyze the design for life cycle Construct prototypes, making changes to tools, materials, and procedures as needed Record iterations of prototyping 	<p><i>Students are expected to know the following:</i></p> <ul style="list-style-type: none"> media technologies media production to enhance, alter, or shape the technical elements of a project development, maintenance, and evolution of voice in storytelling ethical, moral, and legal considerations of using media arts technology to reproduce and distribute images, and how to deal with these issues in the design process image-development strategies and image manipulation in order to create, respond to, or challenge design problems role of media arts in reflecting, sustaining, and challenging beliefs and traditions ways in which content and form influence and are influenced by historical, social, and cultural contexts ways that innovative technologies reflect the complexity of social, environmental, and ethical concerns of the 21st century developments in media arts that incorporate the audience as active participants in the construction and evolution of content characteristics and influences of various artists, movements, and periods

Learning Standards (continued)

Curricular Competencies	Content
<p><i>Testing</i></p> <ul style="list-style-type: none"> Identify feedback most needed and possible sources of that feedback Develop an appropriate test of the prototype Gather feedback from users over time to critically evaluate their design and make changes to product design or processes Iterate the prototype or abandon the design idea <p><i>Making</i></p> <ul style="list-style-type: none"> Identify appropriate tools, technologies, materials, processes, potential funding sources, and time needed for production, and where/how these could be available Use project management processes when working individually or collaboratively to coordinate production <p><i>Sharing</i></p> <ul style="list-style-type: none"> Share their progress while making to increase feedback, collaboration, and, if applicable, marketing Decide on how and with whom to share or promote their product, creativity, and, if applicable, intellectual property Critically evaluate their design thinking and processes, and their ability to work effectively both as individuals and collaboratively in a group, including the ability to implement project management processes Identify new design issues, including how they or others might build on their concept <p>Applied Skills</p> <ul style="list-style-type: none"> Demonstrate an awareness of safety issues for themselves, co-workers, and users in both physical and digital environments Identify and evaluate their skills and skill levels, in relation to their project or design interests, and develop specific plans to learn or refine their skills over time <p>Applied Technologies</p> <ul style="list-style-type: none"> Explore existing, new, and emerging tools, technologies, and systems and evaluate their suitability for their design interests Analyze the role and impact of technologies in societal change, and the personal, social, and environmental impacts, including unintended negative consequences, of their choices of technology use Analyze how cultural beliefs, values, and ethical positions affect the development and use of technologies 	<ul style="list-style-type: none"> ways to use elements of design and principles of design to convey a message, create an effect, and/or influence personal preference technical, stylistic, symbolic, and cultural influences and their intentional use to target audiences use of form, content, and visual and sound effects to achieve a specific emotional response in a target audience choice of media use in the social advocacy of First Peoples in Canada
